

More and more of Guernsey Water's customers are now having water meters fitted - in fact there are now more metered customers than there are unmetered customers in the island!

## The Figures

No. of Occupiers	Average Quarterly Usage	2019 Quarterly Bill (including standing charge)
	15 cubic metres	£77.36
	30 cubic metres	£116.96
	45 cubic metres	£156.56
	60 cubic metres	£196.16
	75 cubic metres	£235.76

If you have a water meter fitted to your property, you are charged according to the quantity of water that you actually use, rather than the TRP of your property.

## How can I use less water?

### In The Kitchen

- Mend that leaky tap! And never leave a tap running
- Only use your washing machine & dishwasher on a full load
- Store drinking water in a jug in the fridge rather than waiting for the tap to run cold.

### In The Bathroom

- Taking a quick shower uses a lot less water than a bath.
- Turn the tap off whilst you brush your teeth!
- Put the plug in the basin and only run as much water as you need

### In The Garden

- Use a water butt to collect rainwater, use this water for watering plants
- Use a watering can instead of a hosepipe or sprinkler
- Water plants when its cool (early morning or during the evening) to reduce evaporation
